DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Sunday, 22 August 2021 at 02:32 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to be Low across the UK, with much of the country seeing unsettled weather conditions continuing.

Tomorrow: Mainly Low air pollution levels are expected, but perhaps locally Moderate in the Central Belt of Scotland as light winds hinder the dispersal of locally-generated pollutants.

Outlook: Air pollution levels should remain Low for most parts, although some areas in the north of the UK may see local Moderate levels develop in light winds.
